## HIGH LEVERAGE AVIATION SNIPS

AgBoss High Leverage Aviation Snips are built for long life and durability. The jaws are made of forged chrome molybdenum steel that are micro serrated for anti-slip operation. The chrome plated blades protect against corrosion and the flush pivot bolt allows smooth access from any pouch.

The lock secures the tool for storage and is easily operated with one hand. The snips have a compound-leverage mechanism that makes cutting easier and reduces hand fatigue.

A cutting capacity of 1.2 mm cold rolled and 1mm stainless steel.

This aviation snip is a quality tool you can rely on to make precise cuts through sheet metal and other materials with ease. Ideal for left or straight cuts.
