AgBoss manufacturing in Australia since 1999...

ABOUT AGBOSS GROUP

We were established in 1991 and have always been based in Albury-Wodonga. We have a close connection with the land and the people who work it.

Our company continues to grow and we have worked hard to develop a quality range of new, practical and innovative products whilst developing close relationships with farmers and the agricultural merchandise community. We started manufacturing in 1999 and haven't stopped since!

INNOVATION

AgBoss are innovators, not copiers, which means we get copied!

Did you know that our ***PourMaxx*** jugs, buckets our RainMaxx rain gauges and our FeedMaxx scoops were designed and manufactured by us in Albury going back to 1999 and have now been copied and manufactured in China and New Zealand and then sold back into Australia?

We continue to manufacture in Albury and are proud to employ local people to produce our Australian Made and designed products.

We are continuing to design products and test them on our own cropping and cattle properties to ensure that you the farmer get a long lasting quality solution and that the rural merchandise stores can sell our products with confidence.

WE DESIGN PRACTICAL PRODUCTS FOR PRACTICAL PEOPLE

If it looks like ours but it's not made in Australia - it's a copy!

AGBOSS MANUFACTURING CAPABILITIES

Have a project or product you need made?

From a simple idea, a spare part for your header through to full scale production, AgBoss has the expertise, equipment and team to make it happen.

AgBoss is a second-generation advanced Australian manufacturer with capabilities in plastic and steel production. We partner with OEM's across the agricultural, lifestyle and commercial sectors, taking products from **concept** to **volume production** with speed, quality and control.

Our Core Capabilities - Plastics

- **Injection Moulding** - High and low volume production using ABS, PP, HDPE, LDPE Nylon, PC, PS and more.
- **Rotational Moulding** - Medium to large hollow products with consistent wall thickness and embedded graphics.
- **Blow Moulding** - Hollow products up to 10 litre capacity including jerry cans, pipe joiners etc.
- **Plastic Welding** - Hot plate and hot air welding for repairs and strong airtight joins.

Metal & Fabrication

- **Steel Fabrication** - Mild steel, stainless steel and aluminium.
- **Fibre Laser & Tube Cutting** - Flat bed and tube processing up to 8m lengths.
- **General Workshop** - Welding, cutting, machining and finishing.

Branding & Finishing

- **Screen Printing** - Flat, cylindrical and conical surfaces up to 5 colours.
- **Pad Printing** - Detailed branding on flat and complex surfaces.
- **Vinyl Cutting** - Logos, labels and custom graphics.
- **3D Printing** - Concept samples and visualisation models.

Engineering & Production Support

- **Engineering Design** - 3D CAD design from concept to production.
- **Project Management** - End to end management from brief to product release
- **Warehousing & Distribution** - Integrated logistics and fulfilment.

RAT Barrow stands for Ride on, Articulated, Tipping Barrow.

It has a top speed of 10 kph and provides a safe and stable ride carrying loads up to 200kg.

Powered by an electric start 8.75 Professional Series Briggs & Stratton engine coupled with a Tuff-Torq hydrostatic transmission, it provides a reliable low maintenance drive train.

The RAT Barrow's frame is powder coated in black hammer tone with a UV stabilised poly tub and guards which are completed with stainless steel fittings. This means that your RAT Barrow will handle all the elements and last you a lifetime.

Note: Transporting the RAT Barrow requires a medium to large trailer.

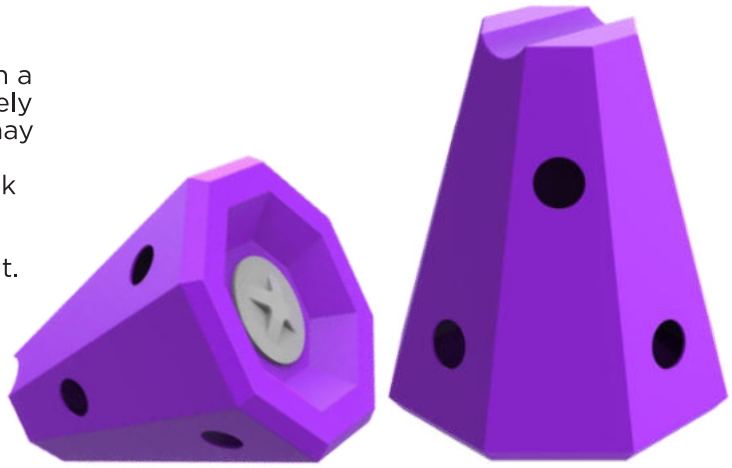
EQUINE

Jump 'n' Munch Hay Feeder

NEW!

AUSTRALIAN MADE AND OWNED

This innovative slow feeder & boredom buster keeps hay contained & prevents it from blowing across the paddock. Horses & ponies take to it almost instantly. Its cone shape ensures it rolls in a circle rather than in a straight line, so it's less likely to end up under a fence. Built to hold as much hay as a large hay net or hayrack, this is a serious feeder. The funnel-shaped top makes filling quick and easy. It's also dual-purpose, it's designed to function as a pole block. Use at its full 600mm height or cross two poles for your desired height.



- Made from UV stabilised polyethylene
- Tough and durable
- Reduces boredom
- Australian Made

Grazer Bin

A revolutionary Australian-made slow feeding system that encourages natural grazing behaviour and reduces hay waste. With a movable hay insert (75 or 100mm cutouts), horses or ponies can graze gradually in the correct posture. Durable and travel-ready.

- Made from UV stabilised polyethylene
- Size - 65H x 56Dcm, 8.5kg
- Doubles as a water trough, chaff bin or storage container
- Australian Made

MilkMaxx Comfort Teat

NEW!

The MilkMaxx™ Comfort teat is engineered for farmers who value a slow, controlled milk flow that encourages natural suckling, reducing the risk of digestive upset and supporting steady growth. Its design draws on proven calf feeding principles, combining durability, calf comfort, and easy maintenance to deliver reliable performance season after season.

- Encourages natural, slower suckling for healthier digestion
- Durable construction for long-term farm use
- Easy to maintain and clean

SKU	Description	UOM	MOQ/Pk Qty	Multiplier	Barcode

MilkMaxx Flexi Teat

NEW!

The MilkMaxx™ Flexi Teat is designed for farmers wanting a faster flow with a natural feel, making it ideal for young calves or supplementing older ones. Its shape encourages healthy drinking while reducing cross suckling. Made from a soft yet durable compound, it's gentle on calves but tough for repeated use. Easy to clean and install, it delivers reliable, cost effective performance in both bottle and multi feeder setups.

- Faster-flow design suited to young or fast-drinking calves
- Soft, durable compound gentle on calves' mouths
- Compatible with bottle and multi-feeder setups

McKee Touch Teat

NEW!

Designed for reliability and ease of use, this durable rubber teat prevents milk leakage with its unique non-flooding design. Made from UV-resistant rubber and backed by a two-year no-leak guarantee, it offers long service life in tough conditions. Milk flow is triggered only by suckling, ensuring calves receive the right amount while keeping pens cleaner. With its robust construction, it delivers dependable performance and healthier feeding.

- UV resistant rubber ensures extended outdoor durability
- Internal design stops flooding and minimises waste
- Two year leak-proof guarantee for added reliability

MiLK maxx AGBOSS FEED SYSTEMS

AUSTRALIAN MADE AND OWNED

At AgBoss, we are very excited about the MilkMaxx™ range of dairy products. Since 2010, the AgBoss Group (and formally Walk West) has been dedicated to supporting farmers with practical, reliable solutions for calf rearing. Beginning with the distribution of quality calf teats, the business quickly expanded into designing and manufacturing its own feeders, driven by a commitment to durability and ease of use on farm. Every plastic feeder tank is manufactured in-house, using robust moulding processes that ensure strength and long service life. To complement this, all metal components are precision engineered in the AgBoss workshop, giving farmers confidence in the reliability of every part. By combining trusted teat distribution with complete feeder production, AgBoss delivers a full system, built to withstand the daily demands of calf rearing, proudly supporting Australian farmers for over 26 years.

BEER & BURGER JOINT

CUSTOM BRANDING

Get your brand in your customers hands!

Plain Product
Unbranded measuring jugs, cylinders, buckets, scoops and rain gauges may function well, but they do nothing for your brand. Every plain container is a missed chance to reinforce your name and presence. Custom-branded measuring products ensure your brand is seen and remembered every time they're used.

Increase Your Brand Visibility
When you use our custom branded measuring products, you greatly increase your brand visibility. Your brand is literally in the hands of your customer. What could be a plain product is now branded with your logo, brand colour and company information. That means anyone using it will see your brand and register it in their mind. Next time they need to buy a product or service you offer, they'll think of your brand first.

Dry Flowables
We will calibrate the jug, cylinder, bucket or scoop for your specific DF product to provide an accurate measure for your customers. This has the effect of promoting your brand and for the farmer to be accurate in measuring out expensive chemicals.

Plastic Tinting
Because we manufacture these products in-house, we are able to offer various raw material options including plastic tinting of your chosen measuring products in whatever colours you desire. We work with opaque and translucent options and offer a huge range of colours to match your logo and business colours. We use food-grade and chemical-resistant plastics which can be recycled at the end of their life.

Look for this logo!

AgBoss
IRRIGATION

Vaughan Junior

The Vaughan Junior Irrigator is a compact, mechanical solution for efficient watering horse arenas with a 100m run and up to 24m throw, it's built for performance. The Junior stops automatically (optional valve) at the end of its pass making it a hassle-free asset.

- 3.2m boom, 100m cable run, 1.2 - 7.4 l/s
- Low pressure irrigator from 10 - 90psi
- Optional auto shut off valve available

QUAD

Vaughan Effluent Nozzles

Turn your Vaughan irrigator into an effluent disposal unit. These flexible rubber nozzles allow semi solids to pass through without blockages. In the rare event a blockage does occur, simply disconnect the camlock, clean and reconnect.

- Made from flexible rubber
- Quick disconnect & reconnect
- Abrasion resistant & heavy duty

AgBoss
WOOL SHED

Fold Up Wool Pack Stand

NEW!

AUSTRALIAN MADE AND OWNED

The AgBoss Fold-Up Wool Pack Stand is the smarter solution for modern wool handling. Unlike traditional fixed-frame pack stands that get in the way after shearing, this innovative design is built to fold away quickly and store with ease. Whether you're working in a shearing shed or out in the field, this stand is built tough & ready to boost your productivity. With its durable construction, and tool-free setup, the AgBoss Wool Pack Stand is the ultimate portable packing solution for wool, green waste, recycling, & more.

- Foldable & portable - tool free set up
- Low front for comfortable & efficient loading
- Rugged build - fully hot dipped galvanised
- Safe & secure - pack clamps are chained to the frame to avoid misplacement
- Holds full sized wool bale

IronShield Fire Rake

The AgBoss Fire Rake is a versatile two-sided tool featuring coarse rake tines on one side and a flat sharpened hoe on the other, mounted on a wooden handle. Widely used in Australia for wildfire suppression and trail restoration, it delivers reliable performance across demanding outdoor tasks. Inspired by the original McLeod tool developed in 1905 by US Forest Service ranger Malcolm McLeod, it was designed to rake fire lines and cut branches and sod. This proven combination makes it an essential tool for firefighting and land management across Australia.

- Two-sided blade with a rake and a flat sharpened hoe for versatile use
- Standard tool for wildfire suppression and trail restoration in Australia
- Designed to rake fire lines, cut branches and sod and maintain hiking trails
